# GROUNDING IN SUSTAINABILITY

Sustainability has always been a focus of Marmot's design and manufacturing.

## Factory Welfare

Protecting and promoting the well-being of the people who make the products we sell is a core component of running a responsible business. We require all suppliers to adhere to our Code of Conduct and we physically audit their facilities annually.

## Environmentally-Friendly Fabrics

Bluesign® is the leading standard for apparel that ensures the elimination of harmful substances and guarantees environmentally responsible and safe production of materials.

## Recycled Materials

Industrial nylon waste is upcycled into new nylon yarn reducing the petroleum & energy necessary to create virgin yarn. 36% of Marmot's volume uses recycled, upcycled, and renewable materials.

## Environmentally-Friendly DWR

Many of our shells now utilize PFC-free waterproofing treatment using natural materials with by-products that break down faster in the environment.
